

POSITIVE INSIDE!

The Backbone of Progress: Mrs. Jyotsna Mutalik Impactful Journey

Mrs. Jyotsna Mutalik is a first-generation entrepreneur who has been managing various areas of business, with a strong focus on finance and costing. She is known for her critical thinking and problem-solving skills, making her a beloved figure within the organization. Over the years, she has trained many young professionals. Jyotsna ma'am played a pivotal role in achieving ISO certification for the organization and has consistently maintained this status. Her passion for digitalization led to the development of an in-house ERP system, which has been in operation since 2020 and continues to evolve to meet the organization's needs.

Story Of Metallic Diaphragm Pump!

We developed the Metallic Diaphragm Pump to address the challenges of extreme pressure, high temperature, and aggressive chemical handling faced in industries like oil & gas, petrochemicals, and power generation. Traditional diaphragm pumps were not designed to operate reliably in such harsh environments.

Our solution — a rugged metal diaphragm — ensures minimal deflection, superior mechanical strength, and extended service life. To enhance safety and protect process integrity, we also integrated a diaphragm rupture detection system that provides early warning in case of diaphragm failure.

The result is a high-performance dosing solution that delivers unmatched reliability, accuracy, and protection, even under the most demanding operating conditions.

Project Highlight: Phosphate Dosing System for GAIL (India) Limited – Usar, Maharashtra

Positive Metering Pumps (India) Private Limited is proud to have designed, engineered, and manufactured a customized Phosphate Dosing System for GAIL (India) Limited's prestigious Propane Dehydrogenation (PDH) Project, integrated with a Polypropylene Production Unit at Usar, Maharashtra.

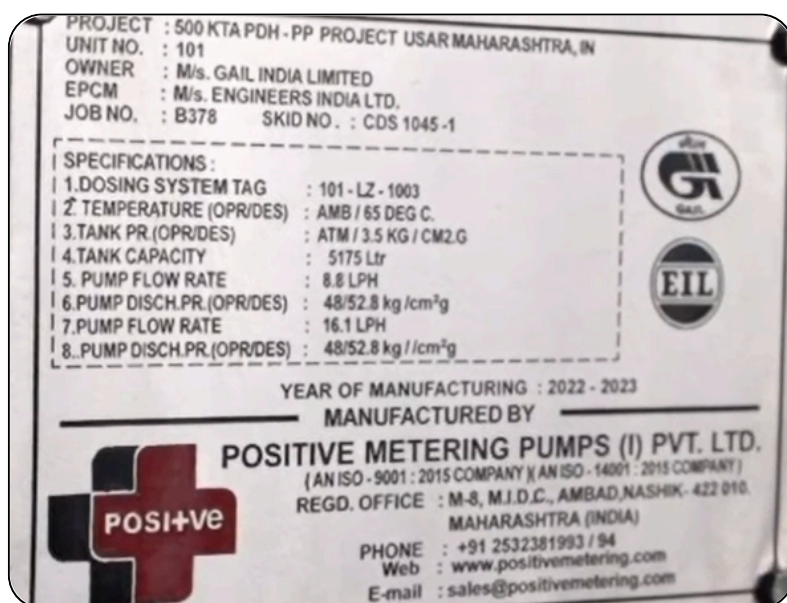

This state-of-the-art chemical dosing system plays a critical role in ensuring optimal process efficiency and corrosion prevention in high-pressure steam and water systems by precisely dosing phosphate-based chemicals. The system has been developed to meet stringent industry requirements and adheres to best-in-class engineering standards.

Key Project Highlights:

- Client: GAIL (India) Limited
- Location: Usar, Maharashtra, India
- Application: Phosphate Dosing for Boiler/Steam Circuit
- Project Scope: Design, engineering, manufacturing, and supply of a fully integrated skid-mounted dosing system

The complete system was meticulously inspected and approved by Engineers India Limited (EIL), ensuring compliance with all technical, safety, and quality benchmarks set forth for this critical national infrastructure project.

Positive Metering Pumps (India) Private Limited is honored to contribute to GAIL's advancement in petrochemical production, supporting India's growing energy and polymer sectors with reliable and innovative dosing solutions

Customer Success Story

6 Years of Trust: Wave Industries Ltd., Dhanaura

At Wave Industries Ltd., Dhanaura, operational consistency and durability matter. That's why, for the past 6 years, they've relied on Positive Metering Pumps (India) Private Limited to handle their critical chemical dosing needs.

The Requirement

Wave Industries needed a robust, low-maintenance dosing solution to support continuous operations in their sugar and distillery units. Their environment demanded high precision and long-term resilience in handling process chemicals.

The Solution

We provided a line of mechanically actuated diaphragm dosing pumps, known for:

- High chemical compatibility
- Consistent stroke performance
- Simple design for easy servicing
- Built-in safety features for operator protection

These pumps have been running non-stop since installation, reflecting not just the product's quality, but also the effectiveness of proper engineering in real-world conditions.

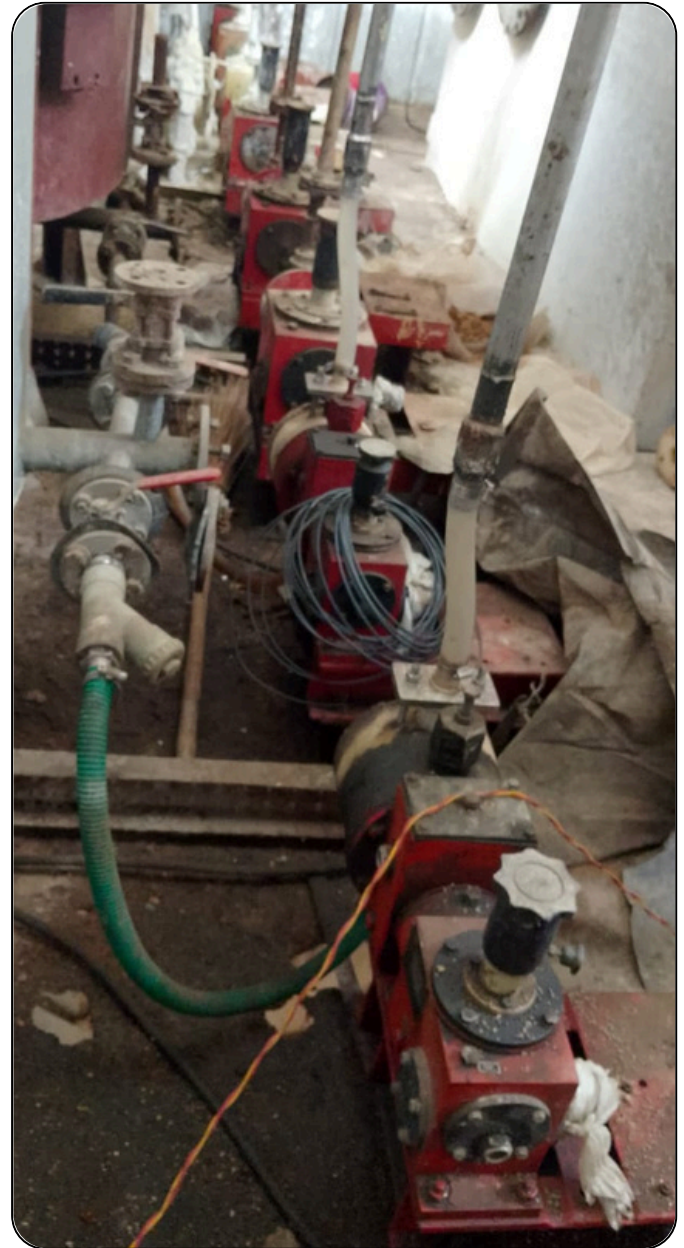

The Result

- ✓ 6+ years of uninterrupted service
- ✓ Trusted performance in tough industrial settings
- ✓ Minimal maintenance or part replacement
- ✓ Continued confidence in Positive Metering's solutions

Customer Feedback

These dosing pumps have stood the test of time. They've been working reliably for over six years with hardly any breakdowns. We appreciate the quality and consistency that Positive Metering Pumps brings to the table."

— Engineering Head, Wave Industries Ltd., Dhanaura

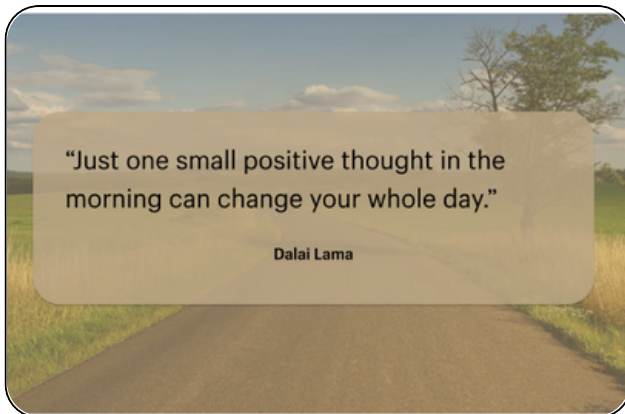

A Journey of Growth

I am Yogesh Shirsath, and I recently completed 10 wonderful years with the Positive family. This journey has shaped my personality and enhanced my skills in many ways. I'm thankful for the support and opportunities, and I look forward to continuing to grow and contribute with the same passion.

Thought of the Day!

"Just one small positive thought in the morning can change your whole day."

Dalai Lama

This beautiful quote by the Dalai Lama reminds us how powerful our thoughts can be:

"Just one small positive thought in the morning can change your whole day."

Set against a peaceful countryside road and a clear morning sky, this image symbolizes a fresh start — a path open to new possibilities. Let your mornings begin with calm, gratitude, and a single uplifting thought. It might just shape the rest of your day in the most wonderful way.

Giggle of the Day!

Do not drink water after eating fish because Drinking water may cause the fish to swim and then you will feel gulugulu gulugulu in your stomach 🐟😂

Puzzle-Brainstorm
